

SOLUTION BRIEF

Data Management & Data Protection

Big data challenges can leave users hanging, but smart data solutions make it accessible, secure and highly useful again.

Data is the lifeblood of any business, so making it accessible and secure is mission-critical.

IT professionals have a full load, especially when it comes to managing and protecting data. From escalating data volumes and increasing regulation to evolving end user demands and cloud-based applications, managing and protecting data gets more and more complex with each passing year. Add on the burden of external data sources, complex legacy systems, and pressure from the business... and you have a recipe for big trouble with big data.

Smart data management and protection starts with understanding your organization's unique requirements for each type of data. Is it business critical? How long can you live without it? Can users access it easily from anywhere? Answers to these and other critical questions must be addressed in order to prepare a comprehensive data management and data protection plan. Fortunately, cStor experts can help.

Get maximum value out of data with smart solutions to help you manage and protect it anytime, anywhere.

At cStor, we combine in-depth experience and proven expertise with storage and other data center technologies across key business applications from best-of-breed providers such as Microsoft, IBM, Oracle, SAP and more. That means we can help deliver smart, integrated solutions designed to meet the unique needs of the business.

Benefits of Expert Data Management & Data Protection Solutions

-  **Lower Data Management Costs.** Get expert implementation and integration support to streamline how data is managed, protected and accessed.
-  **Improve Recovery Time.** Smart data management and protection means improved backup systems to help speed data recovery in the event of an incident.
-  **Shrink Backup Windows.** Improve your ability to plan and execute system backups to avoid data access delays and reduce overall downtime across the organization.

cStor is a great go-to partner for any of our technology questions. From migrating data to the cloud and assessing our data environment for our whole server network — to technology and data solutions for individual workstations, they are a great resource for any type of challenge we might have.

—Dan Lawler, Director of Development, Alzheimer's Association

Data Management & Data Protection Areas of Expertise

Our experienced IT professionals dive deep to assess your unique business needs and storage environment so we have a clear understanding of your goals. That process allows us to architect a high-value storage infrastructure built on industry-leading technology solutions, and ensure it is well-integrated into your environment to drive capacity and performance improvements. Better still, our team of experts can deliver ongoing management and support for the life of the solution.

Flexible delivery service engagement options.

Onsite. For teams that need face time, cStor experts set up onsite throughout the duration of the engagement to help monitor, maintain and optimize data and system performance so your team can focus on more mission-critical activities and being responsive to everyday operations.

Remote Only. Today's advanced technology means teams can meet online and systems can be monitored remotely so implementation and integration projects are managed seamlessly with minimal business disruption and drain on internal resources.

Hybrid. Some engagements call for both onsite and remote support to blend the perfect mix of face time and internal staff knowledge with additional expert resources to help with ongoing system support from remote locations.

Fixed Schedule. At times, your team may only need a fixed schedule with support for day-to-day service management tasks so your team can redirect time and attention to more strategic initiatives.

Let's Get Started

Learn more about how cStor can work with your team to improve IT delivery of today's leading hardware and software solutions to streamline operations, maximize assets and meet evolving user demands. Contact cStor to schedule an appointment today.

About cStor
