

SOLUTION OVERVIEW

Vendor Risk Management

powered by Terra Verde

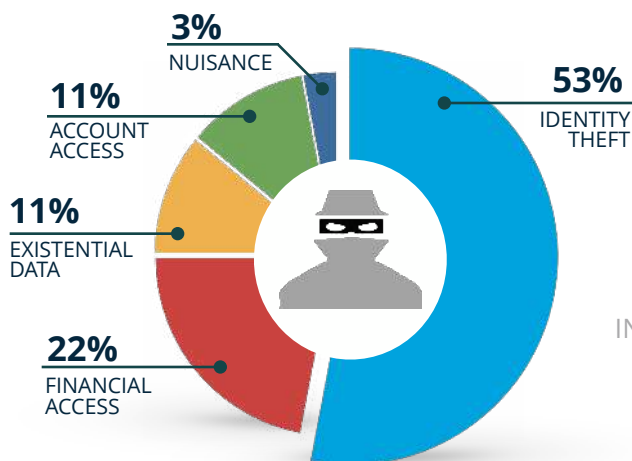

Get proactive about assessing your partners large and small to find *and fix* risk and security vulnerabilities before they are exploited.

Small to large Fortune 500 organizations around the world are doing business with, communicating to, and electronically connecting or integrating with 3rd party vendors and business partners. Every company needs vendors and business partners in order to thrive and grow. But with many communication channels between various partners, organizations need to get proactive about assessing and addressing risk and security vulnerabilities before they can be exploited.

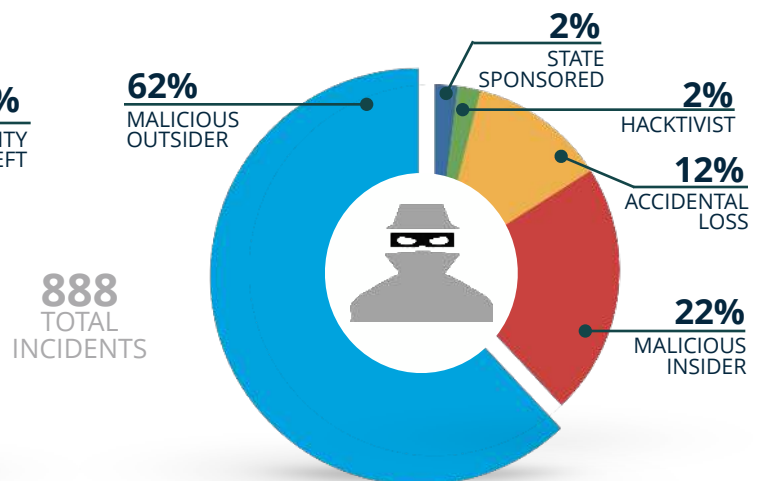

Vendor Risk Assessment & Managed Security Services

In today's world, the need for such sustainable security programs to monitor, report and help address cyber attacks and breaches is universal. Major breaches over the last 24 months have validated the need for organizations of every size to assess their 3rd party vendors and business partners for security and compliance related policies, processes, controls and technology.

Number of Breach Incidents by Type

Number of Breach Incidents by Source

The Terra Verde solutions have helped advance the security and risk management operations of State Collection Service. Selecting them was an easy decision.

Sustainable Risk Management

Now cStor and Terra Verde's Vendor Risk Assessment Management program can help you identify, track and proactively manage and reduce security and compliance risks among their 3rd party vendors and business partners. As a subscription service, you have peace of mind in 24/7/365 monitoring and support, so you can focus more time on your business and leave security to the experts.

Managed Security Services

Our Vendor, Risk Assessment and Management Services are ideal for organizations of all sizes that require vendors, suppliers and business partners to be assessed for security risks, vulnerabilities or regulatory compliance.

Our expert team will collaborate with your company to deploy a customized web based service and comprehensive program that screens, assesses, benchmarks and ranks vendors security or compliance risk.

Vendor Risk Assessment and Management Services include:

- Customized assessment approach and screening questions based on your company's security and compliance policies and practices (we can also help define these)
- Secure, dedicated, password protected web based survey and assessment platform
- Inspection, research and validation of vendor anomalies, risks, vulnerabilities
- Customizable reports, dashboards for tracking and reviewing vendor assessment, survey scores
- Our consulting team can perform deeper vulnerability and compliance assessments and penetration tests on facilities, networks, websites, applications and mobile applications, when deeper levels of analysis or testing is required (Letter of Assessment, PCI, HIPAA or other compliance).

Why cStor & Vendor Risk Management powered by Terra Verde

The Vendor Risk Management and Managed Security Services offer a comprehensive solution for addressing risk and vulnerabilities associated with existing and potential partners.

- Deploy a repeatable, scalable set of standards, practices and a "program" for security alert monitoring, management and remediation.
- Reduce overall security and compliance risk.
- Reduce and eliminate capital expenditures for security technology and personnel.
- Deploy a new, or optimize an existing Security Operations Center.

About cStor

cStor helps companies strategize, create, and implement data center, cloud and security solutions that address the business needs and demands of today's successful enterprise.
