

## **Allgress Insight Risk Management Assessment Module v6.1 Fast Facts**

Demonstrating compliance needs to be done in a method that is consistent, repeatable and defensible. Spreadsheets and pivot tables are time-consuming and error prone. Allgress provides the automation necessary to aggregate and interpret the information in a meaningful way to a variety of audiences. Thus, reducing the pain of managing multiple and complex compliance initiatives, while also minimizing the associated costs and risks of non-compliance.

Leveraging the Allgress Assessment Module, you can:

- Automate labor intensive and manually repetitive actions that lead to complexity and errors, by employing a repeatable process for any type of Assessment.
- Identify the relationships that exist between the various regulatory control statements.
- Enable the mapping of regulatory mandates and frameworks to policies and technical controls.
- Demonstrate compliance with unlimited multiple industry regulations and frameworks.
- Ensure that business & IT policies are aligned and maintained against the backdrop of evolving regulatory mandates.
- Maintain a central repository with built in reminder notifications and easy workflows for assessments & risk acceptance with cross-organizational collaboration.
- Create executive Dashboards with empirical data and meaningful reports.
- Leverage rich reporting with many graph and chart options.
- Create and execute remediation plans in real-time to help mitigate identified risks.
- Reduce the scope and cost of outside audit activity with proactive preparation leveraging Allgress.
