The leader in preventing data breaches from insider privilege abuse and external hacking attacks

## Reducing IT security risk with unmatched visibility and control

The majority of data breaches today involve insider privilege abuse, external hacking attacks, or often a combination of the two. Employees, vendors and contractors frequently have unnecessary access to sensitive systems and data, while unpatched IT assets open the door to cybercriminals. Despite massive investments in security infrastructure, IT and security leaders still struggle to obtain a clear picture of risk — let alone take decisive action to eliminate it.

BeyondTrust® is a global security company that believes preventing data breaches requires the right visibility to enable control over internal and external risks. We give you the visibility to confidently reduce risks and the control to take proactive, informed action against data breach threats. And because threats can come from anywhere, we built a platform that unifies the most effective technologies for addressing both internal and external risk: Privileged Access Management and Vulnerability Management.

BeyondTrust: Your ally against internal and external IT threats

Your IT and security teams have plenty of adversaries to worry about — inside and outside, malicious and accidental. BeyondTrust can be your ally against all of them.

Our 4,000+ customers leverage class-leading PowerBroker® Privileged Access Management (PAM) and Retina Vulnerability Management (VM) solutions that share a common management, reporting and analytics platform.

THE POWERBROKER PRIVILEGED ACCESS MANAGEMENT PLATFORM

Enterprise Password Security	Endpoint Least Privilege	Server Privilege Management
Gain control over privileged credentials and sessions	Remove excessive user privileges and control applications	Control, audit and simplify access to critical systems
APPS | DATABASES DEVICES | SSH KEYS | CLOUD | VIRTUAL	WINDOWS | MAC	UNIX | LINUX | WINDOWS

BeyondInsight

ASSET & ACCOUNT DISCOVERY | THREAT & VULNERABILITY INTELLIGENCE /BEHAVIORAL ANALYTICS | REPORTING & CONNECTORS | POLICY & ACTION RESPONSE

The PowerBroker Privileged Access Management Platform

The PowerBroker Privileged Access Management Platform integrates best-in-class solutions that deliver visibility and control over all privileged accounts and users. By uniting capabilities that many alternative providers offer as disjointed tools, the platform simplifies deployments, reduces costs, improves system security, and reduces privilege risks.

- **PowerBroker Enterprise Password Management** prevents the credential abuse and misuse that lead to most data breaches today. The solution enables you to store passwords securely, rotate them regularly, and monitor their use. As a result, you gain visibility and control over privileged credentials – as well the systems they're designed to protect.

- **PowerBroker Endpoint Least Privilege** closes security gaps left by other solutions, providing you with visibility and control over user, account and system security. Whether your environment consists of Windows endpoints, Mac endpoints, or both, PowerBroker provides a more complete, easy-to-use, and cost-effective least-privilege solution

- **PowerBroker Server Privilege Management** enables you to strike a perfect balance between security and productivity by gaining comprehensive visibility and control over Unix, Linux and Windows servers – while providing administrators the access they need to move your business forward.

All PowerBroker platform solutions are centralized around a core set of powerful management, reporting and analytics capabilities:

- **Asset & Account Discovery:** Automatically discover and manage all privileged accounts and assets in your organization.

- **Threat & Vulnerability Intelligence:** Identify high-risk users and assets by teaming behavioral analytics and vulnerability data with security intelligence from best-of-breed security solutions.

- **Reporting & Connectors:** Understand and communicate risk with over 280 privilege and vulnerability reports, and share security data via a wide range of connectors for best-of-breed security solutions.

- **Policy & Action Response:** Be alerted to in-progress attacks and automatically mitigate threats in real time.

Retina Vulnerability Management Solutions

Retina vulnerability management solutions reveal risks in the proper context and enable smarter decision making with unmatched reporting, scalability and coverage. Learn more about Retina at **www.beyondtrust.com.**
