Transform the Business from the Inside Out with
Intelligent Video Surveillance Solutions

From compliance monitoring and facility optimization to improving operations and securing IoT devices, video is solving big business challenges like never before.

Expand video surveillance capabilities to transform and protect nearly any area of the business.

The advent of IP video surveillance technology combined with powerful video management software and advanced analytics means it's no longer a function focused solely on security, loss prevention and fraud investigation. Now video surveillance is used for value-added functions to improve nearly any area of the business across a wide variety of industries.

Whether you need to monitor manufacturing to ensure industry compliance, deploy new ways to improve customer service, or uncover hidden opportunities for streamlining operations and reducing costs, bundled video surveillance solutions can deliver big benefits. cStor combines the latest hardware, software and consulting expertise into proactive solutions that help you solve everyday business problems as well as your toughest challenges. That means new value, efficiencies and untapped ROI.

Intelligent Video Surveillance Delivers Big Business Benefits

- Ensure and maintain regulatory compliance mandates
- Optimize and protect operations, production lines, and intellectual property
- Transform cameras into intelligent analytical devices
- Gather game changing business intelligence
- Improve public safety
- Reduce incident response time
- Alert law enforcement with mobile applications
- Monitor remote facilities
- Streamline workflows and employee activity
- Monitor and protect against IoT cyber attacks

Expert video site audits help assess opportunities and threats across the business where Intelligent Video Surveillance can make the biggest impact.

cStor experts conduct a thorough yet efficient video site audit across one or multiple locations to quickly assess the strengths, weaknesses, opportunities and threats of your current system. From there our team offers a smart, innovative game plan for enhancing your capabilities to improve multiple areas of the business, meet your business goals and solve your unique challenges.

cStor
We look beyond IT

Organizations are finding new and innovative ways to leverage video surveillance data beyond security using powerful video management software, advanced analytics and IP-based camera technology.

Expert guidance helps maximize the value of your video data to put you on a path for success

Our experienced video surveillance team collaborates with your experts to thoroughly assess your unique business needs to understand your goals and challenges. From there, we'll architect a comprehensive Intelligent Video Surveillance solution using best-of-breed technology providers that our team has fully vetted and implemented.

That expertise allows us to identify areas that can leverage your existing investments while expanding your capabilities to meet your goals and solve your unique business challenges.

Move Beyond Security by Extending and Optimizing the Value of Your Video Surveillance System

Monitor Compliance • Improve Productivity • Streamline Workflows • Prevent Fraud & Theft • Reduce Human Error • Avoid Penalties & Fines • Monitor Remote Facilities • Optimize Resources

Benefits of Converting from Analog to Digital Solutions

Moving your video operations from the guard shack to the data center requires unique I.T. skills provided by cStor. Such modern systems offer corporate IT, facility, operations and security professionals new capabilities to:

- Deploy non-proprietary open architecture solutions
- Capture higher quality images at faster frame rates
- Ensure data integrity by storing critical video on data center class devices
- Search and retrieve large pools of video assets faster
- Enhance productivity with 3rd party analytical applications
- Assist facility managers to meet FDA compliance mandates
- Perform Video Site Audits to assist supervisors in reducing human errors
- Deploy federated secure networks across remote facilities
- Enable disaster recovery and business continuity
- Reduce cyber-attacks via secured video networks
- Share video securely across remote locations
- Integrate your VMS with Access Control

Let's Get Started

Conversion from legacy analog to modern era digital systems requires a comprehensive I.T. technical assessment of your existing infrastructure and a well-defined strategy to ensure a successful deployment.

Contact cStor to learn more about our IVSS Site Assessment Services to help you get started today.

About cStor

cStor helps companies strategize, create, and implement security, data center and cloud solutions that address the business needs and demands of today's successful enterprise.
