Cloud Replication for Veeam

Cloud-based Disaster Recovery
Powered by Veeam

Be prepared for anything with a cloud-based, flexible replication target to support all of your on-premise virtual machines.

Cloud Replication for Veeam gives you a cloud-based, flexible replication target for your on premise virtual machines so now you can quickly and easily provision your replication target without having to maintain a second site.

NO VPN. NO SEPARATE CONSOLE. NO HASSLE.

We take the hassle out of replication with an easy and cost-effective DR solution. Everything is available right out of the box, with no need to learn or maintain additional technology.

We have worked hard in tandem with Veeam to ensure that provisioning your new DR site is a breeze. All of your data is transmitted over a secure SSL/TLS connection via a single port. No messy VPN's, no complex networking configurations. And of course, your new replication to the cloud solution leverages Veeam's world class, built-in WAN Acceleration feature to ensure even the slowest office connections will work.

SWIFT, FLEXIBLE FAILOVER
Whether an entire site or specific VMs, experience fast failover/ failback with almost zero data loss and minimal disruption.

RECOVERY WITH ASSURANCE
Our responsive technical support is available to help 24x7, whether for testing or a production impacting event.

SEAMLEASS INTEGRATION
Trust a replication made with a tight integration with Veeam user interfaces , data collection and workflows.

ADVANTAGES OF CLOUD REPLICATION

- Direct Integration with Veeam V9 and above
- Accounts provisioned in minutes
- Have your DR site configured in hours
- Bring your network with you or reconfigure on the fly
- Available in 4 diverse geographic locations
- Support for VMware vSphere (Hyper-V coming soon)
- 24x7x365 Support for testing or failover events

Let's Get Started
