## RECENT BLOGS & NEWS

### The Real World Use Cases for Implementing a Cloud Access Security Broker (CASB)

As the trust in cloud-based apps continues to grow with no end in site, the volume of cloud-based applications and data continues exploding too. For many organizations, that means the need for a security and policy intermediary has become more pressing than ever.

### How Splunk Can Level Up Your Security Operations Center (SOC) and SIEM

Modern SIEM solutions need to be nimble, distributed, and unencumbered by their architecture due to the sheer volume, velocity, and variety of information needed to truly give the Security Operations Center (SOC) one tool to rule them all.
