

Staff Augmentation Services

There's no reason to face today's complex IT projects alone when you could have a solid wind of expertise at your back.

Expert data center and cloud solution architects to help you advance your IT initiatives.

Today's IT landscape is both wide and deep, making it a growing challenge to keep every needed skill set on staff around the clock. Add in the high market demand for experienced engineering talent, and many companies also struggle to attract and retain the right team just to keep day-to-day operations running efficiently. That means obtaining hard-to-find IT talent that can deliver quality services is not only an ongoing objective, it is often a never-ending battle.

Whether it's a major IT initiative requiring specialized skills, a smaller, short-term project, temporarily filling a resource vacancy, or managing applications and systems through workload spikes, cStor experts can deliver what you need, when and where you need it. Our IT professionals can help fill gaps while bringing deep expertise across a critical range of data center, cloud and infrastructure solutions to help you move forward with confidence.

Staff Augmentation Services

- Source hard-to-find IT skills and expertise.
- Secure resources for large-scale initiatives.
- Fill temporary gaps for specific team vacancies.
- Increase capacity and productivity.
- Get fast access to skilled staff anytime.

Secure skilled talent from a team with deep roots in IT.

cStor experts can help you define project scope for large or small initiatives to help determine your unique staffing needs through any type of IT engagement, and then augment your team's expertise with the right resources for the project. Using our specialized skills, we can help you complete priority or unplanned projects without adding staff.

Benefits of Staff Augmentation Services

-  **Expand IT capabilities.** Stay in lock-step with today's dynamic, ever-evolving IT environment and expand capabilities without increasing full-time staff.
-  **Reduce costs without sacrificing quality.** Get fast access to experienced professionals ready to hit the ground running and advance your objectives.
-  **Increase productivity.** Add expertise and a fresh, objective viewpoint to spark innovative ideas, boost productivity and inspire new thinking in IT service delivery.

"cStor is a true partner focused on quality with a 'no excuses' approach. They help us through all types of IT initiatives with very talented engineers willing to help us any time of the day or night so we can keep systems running more efficiently around the clock. They've also been instrumental in helping us consolidate vendors, equipment and systems to optimize our entire IT function."

—Wade Harding, Corporate IT Manager, Total Transit

Staff Augmentation Areas of Expertise

ASSESSMENTS / AUDITS

cStor experts help conduct project assessments and audits to determine project scope and specific resource needs.

BACKUP REMEDIATION

Ensure data, systems and applications are properly prepared to handle your next IT projects from beginning to end.

VIRTUAL MACHINE ALIGNMENT

Optimize your virtualized environment by making sure machines and resources are well-aligned to your existing infrastructure.

HARDWARE/SOFTWARE UPGRADES

Minimize business disruption and impact with smart planning and expert execution of hardware and software upgrades.

Flexible delivery service engagement options.

Onsite. For teams that need face time, cStor experts set up onsite throughout the duration of the engagement to help monitor, maintain and optimize system performance so your team can focus on more mission-critical activities and being responsive to everyday operations.

Remote Only. Today's advanced technology means teams can meet online and systems can be monitored remotely so all of your IT initiatives can be managed seamlessly with minimal business disruption and drain on internal resources.

Hybrid. Some engagements call for both onsite and remote support to blend the perfect mix of face time and internal staff knowledge with resources needed throughout the duration of the engagement.

Fixed Schedule. At times, your team may only need a fixed schedule with support for day-to-day service management tasks so they can redirect their time and attention to more strategic initiatives.
