

A photograph of two workers rappelling down a large, light-colored rock face. One worker is in the foreground, wearing a striped shirt and dark pants, while another is higher up. They are both wearing safety gear, including helmets and harnesses. The background is a clear blue sky.

SERVICES BRIEF

Expert IT Services

Smart data center and cloud solutions create unlimited potential... but navigating a path to success takes teamwork.

Powerful services help you successfully manage the increasingly complex IT landscape.

Today's business leaders need a collaborative, knowledgeable, agile service partner to help evolve and scale data center operations and leverage the cloud to take advantage of the efficiencies new technology can bring. From orchestrating a complete transformation of an IT infrastructure and addressing specific storage issues, to managing systems, end-to-end implementations, data migrations and more—the experts at cStor make handling your IT environment with proficiency easier than ever before. That means we help solve challenges big or small while making sure you're skillfully managing everyday operations. It also means our team can help you create and manage a more cost-effective environment which best serves your business needs today, while preparing you for the evolving needs of tomorrow.

Reduce risk, improve service and move the business forward faster with expert IT services.

Your IT environment faces new demands and so does your team. Partnering with a leader in data center and cloud technology services means you have an expert team supporting you every step of the way, no matter what steps you plan on taking next.

Benefits of leveraging cStor's expert IT services

- **Control IT costs.** Convert fixed IT costs into variable costs you can more easily control and budget for based on the unique needs of your business.
- **Gain expertise, qualified support.** Key certifications mean our Consulting Service Engineers are qualified and ready to support your unique needs.
- **Benefit from new technology without the risk.** Lean on cStor's vast expertise in industry-leading technology to improve operations, without the risk.

- **Increase efficiency and competitiveness.** Leverage advanced technology and cloud solutions to streamline your business and be more competitive.
- **Stay focused on your core business.** Let cStor experts help manage difficult projects or daily operations so you can stay focused on your business.

Leverage cStor's Consulting Service Engineers and technology expertise to support and optimize your infrastructure and add new efficiencies to everyday operations.

Expert IT consulting services help you reap new rewards and efficiency—without all the risk.

Knowing your business and unique requirements is our goal, that's why we never take a 'one-size-fits-all' approach. Our expert Consulting Service Engineers guide you through the best service options so you can move forward with confidence. Better still, our vendor agnostic philosophy means you get unbiased insight into what systems and technologies will help you advance your business goals every step of the way.

Expert IT Consulting Services

CLOUD

Optimize your cloud infrastructure with smart management, maintenance, backup and planning of cloud solutions.

CONSULTING & OPTIMIZATION

Our experienced resources help you solve your toughest business challenges and optimize your organization.

DATA MIGRATION

Expert data migration services help you smoothly migrate your data to reduce cost, risk and downtime.

DELIVERY

Our comprehensive logistics and implementation services make your installation projects worry-free.

MANAGED SERVICES

Optimize the day-to-day management of your IT infrastructure with a host of managed services options.

STAFF AUGMENTATION

Specialized IT skills for short-term, defined engagements to efficiently handle priority or unplanned projects.

Flexible service engagement options

Onsite. For teams that need face time, cStor experts set up onsite throughout the duration of the engagement to help monitor, maintain and optimize system performance so your team can focus on more mission-critical activities and being responsive to internal stakeholders.

Remote Only. Today's advanced technology means teams can meet online and systems can be monitored remotely so the day-to-day system administration is seamlessly handled with minimal internal resources required.

Hybrid. Some environments call for both onsite and remote support to blend the perfect mix of face time with internal staff and ongoing system support from remote locations.

Fixed Schedule. At times, your team may only need a fixed schedule with support for day-to-day administrative tasks so they can redirect their time and attention to more strategic initiatives.

Let's Get Started
