

SOLUTION OVERVIEW

Cloud Backup & Recovery for Veeam

Make Sure Your Critical Data is Safe & Secure

Make sure your most critical asset—your data—is safe and secure with advanced backup and recovery solutions for Veeam.

Few things are as important to any business as its data. Backing up critical information is not only a smart business decision, it's a necessary move in today's ultra-connected environment. But seeking out an offsite backup location can sometimes be a time-consuming and costly process.

CLOUD BACKUP FOR VEEAM

PhoenixNAP Cloud Backup for Veeam is designed to offer a quickly-provisioned offsite backup at fractions of the cost of implementing a physical data recovery site.

Using the latest versions of Veeam Backup and Replication, you can store a copy of your data in a remote, dedicated, cloud repository accessed via a secure SSL connection and cloud gateway. With optional built-in native WAN acceleration, your data can be placed securely in the cloud in a matter of hours or days. Your critical data can be backed-up in four hours or less. cStor can assist you with a solution that saves you time and money while ensuring your operational readiness in case of a disaster.
