

## Manage Risk & Fortify the Business with a Cybersecurity Plan Built for the Long Haul

cStor experts do the heavy lifting on designing, building and monitoring an advanced Cybersecurity plan that helps you move forward with confidence.

Today's business leaders are challenged by ever-evolving cyber threats. That means getting a sound, framework-based cybersecurity plan that is best suited for the unique needs of your business has never been more critical. Creating an advanced Cybersecurity strategy does far more than just keep hackers out, it protects data assets, maintains compliance, helps you detect and respond to threats faster, improves availability, unifies your business on security priorities, and streamlines operations.

As a trusted Cybersecurity, Cloud and Data Center solutions provider, cStor experts can help you accurately assess your environment by first quantifying and understanding your risks from a holistic viewpoint. From there we help create a risk-based strategy and clear roadmap to improve your overall security posture one smart step at a time.

Using with a thorough **Cybersecurity Framework and Gap Analysis**, we help develop a prioritized, risk-based **Strategic Roadmap** to advance

### 4-Step Cybersecurity Process

#### 1. Select a Framework

Determine the right framework using NIST Cybersecurity Framework or CIS Controls.

#### 2. Secure Stakeholder Buy-in

Create a sound strategy and plan that is ready for key stakeholder review and buy-in.

#### 3. Conduct a Gap Analysis

Thoroughly assess the environment to identify system vulnerabilities and potential risks.

#### 4. Create a Rollout Roadmap

Develop a clear plan, steps and user training while tackling the most mission-critical needs.

your current position to an optimal posture. Once your Gap Analysis and Strategic Roadmap are complete, our expert team can maintain and update your customized Cybersecurity Scorecard and Dashboard ongoing so you can focus on running your business instead of security threats and fire drills running you.

# Cybersecurity Offerings

*Strategy, not technology, should define your cybersecurity roadmap. That's why We look beyond IT.*

## BENEFITS OF BUILDING & EXECUTING A CYBERSECURITY STRATEGY

- Faster Threat Detection & Response
- Insider Threat Reduction
- Improved Availability
- Real DDoS Protection
- Improved Data Security
- Improved Compliance
- Reduced Pre-Exploit Risk
- Streamlined Operations

## COMPREHENSIVE CYBERSECURITY SOLUTIONS

- Network
- End-point
- Cloud
- Compliance / Governance
- Monitoring
- Testing
- Data
- User Training
